eRAD PACS Provide Flexibility for Molecular Imaging's Growth Plan

Greenville, South Carolina - November 17, 2009 eRAD, an industry leader in workflow solutions through its native web-based RIS, PACS and Teleradiology software platform announced today the installation of its newest PACS system equipped with PET/CT Fusion diagnostic tools at Molecular Imaging, Hinsdale, IL. eRAD's Image Fusion plug-in module combines PET/CT and SPECT/CT structural and functional images sharing complementary spatial resolution characteristics into a single volume. RPS Imaging of Michigan City, Indiana was the provider of the eRAD PACS system.

"Molecular Imaging has a vision of the future that includes arrangements with imaging centers around the country. To that end, they needed a PACS that was highly configurable and could adapt quickly to workflow changes," according to Roy Miller, President and CEO of eRAD.

About Molecular Imaging Established in 2005, Molecular Imaging of Suburban Chicago's imaging facilities are the premiere, trusted and respected imaging centers serving several suburban areas of Chicago. There are three locations in Hinsdale as well as locations in Westchester, Wood Dale and Bolingbrook to serve your imaging needs. Services offered are PET/CT, Diagnostic CT, MRI including Open MRI, X-ray, Screening Mammography, Ultrasound and DEXA imaging. Molecular Imaging utilizes state of the art technology and board certified radiologists including chiropractic and podiatric sub-specialties providing accurate, timely and quality diagnostic results. A multi-lingual staff welcomes English, Spanish and Polish speaking patients. Molecular Imaging Where Compassion Meets Technology!
